

A large robotic system with yellow arms is mounted on a vertical column. A worker in a safety vest and mask stands next to it. The robot is applying material to a wall. The base of the robot is labeled '04 BASIL UNIT'.

CANVAS

BUILD IN BOLD NEW WAYS

Canvas empowers contractors by providing a new class of robotic tool for the drywall finishing trade

1

Consistent Quality

Precision application of material creates more consistent finish

2

Improve Safety/Attract Workers

Safer jobs with skills for the future benefits workers and reduces labor risk to projects

3

Shorten Schedules

Reduced steps and drying cycles gives you ultimate control over your schedule

4

Win More Work

Owners are looking for differentiated contractors using tech to reduce their risk
